Human Causes of Global Change (Section 7.2)

You will be researching various types of environmental change caused by humans. With a group, you are to research and complete one row. Get checked off with the teacher, and then share your answers with others around the room to complete the entire table.

Type of Change	Description	WHY is it happening?	Negative Effects to the Biosphere	Negative Effects to the Geosphere and Atmosphere	Efforts to Slow/Stop
Acid Rain					
Ocean Acidification					
Biological Magnification					
Deforestation					
Monoculture					
Habitat Fragmentation					
Overharvesting					
Invasive Species
